IN THE SENATE OF THE UNITED STATES.

LETTER

FROM

THE SECRETARY OF AGRICULTURE,

TRANSMITTING

The annual report of the Bureau of Animal Industry for 1892.

JANUARY 5, 1893.—Laid on the table and ordered to be printed.

U. S. DEPARTMENT OF AGRICULTURE,
OFFICE OF THE SECRETARY,
Washington, D. C., January 3, 1893.

SIR: I have the honor to transmit herewith a report of the operations of the Bureau of Animal Industry for the year 1892, in compliance with the requirements of section 11 of the act approved May 29, 1884, for the establishment of that Bureau.

Very respectfully,

J. M. RUSK,
Secretary.

The PRESIDENT OF THE SENATE.

OPERATIONS OF THE BUREAU OF ANIMAL INDUSTRY FOR THE YEAR 1892.

Since April 1, 1891, the force of the Bureau of Animal Industry has been divided, by order of the Secretary of Agriculture, into four divisions, viz, the Inspection Division, the Division of Animal Pathology, the Division of Field Investigations and Miscellaneous Work, and the Division of Quarantine. The different branches of the work will therefore be considered as it was in the report of last year, under the head of the division to which each belongs.

INSPECTION DIVISION.

To this division is assigned all work of an executive nature, including the eradication of contagious diseases, the inspection of export and import animals, meat inspection, vessel inspection, and the regulation of the movement of animals infected with the protozoal disease known as splenetic or Texas fever of cattle.

CONTAGIOUS PLEURO-PNEUMONIA.

One of the chief objects for the establishment of the Bureau of Animal Industry, as specified in the organic act creating the Bureau, was the eradication of the disease of cattle known as contagious pleuropneumonia. This work has been carried on as rapidly as was possible under the conditions prevailing in this country. In the report of the operations for the year 1891 it was stated that all of the States which had been infected with this disease had been freed from the contagion with the single exception of the State of New Jersey. In that State four affected herds had been found during the year, and it was not possible to consider the State free from infection. A more vigorous policy of inspection and quarantine was at once decided upon, and the result was the discovery of the disease in a few herds where it had previously escaped the vigilance of the inspectors. The affected animals, and all which had been in contact with them, were at once slaughtered, and the result was the complete disappearance of the disease. No affected animals have been found in New Jersey or in any other State since March 25, 1892. On the 26th day of September, 1892, the following proclamation was issued, declaring the United States to be free from this disease:

PROCLAMATION.

ERADICATION OF PLEURO-PNEUMONIA.

U. S. DEPARTMENT OF AGRICULTURE,
Office of the Secretary.

To all whom it may concern:

Notice is hereby given that the quarantine heretofore existing in the counties of Kings and Queens, State of New York, and the counties of Essex and Hudson, State

of New Jersey, for the suppression of contagious pleuro-pneumonia among cattle, are this day removed.

The removal of the aforesaid quarantines completes the dissolving of all quarantines established by this Department in the several sections of the United States for the suppression of the above-named disease.

No case of this disease has occurred in the State of Illinois since December 29, 1887, a period of more than four years and eight months.

No case has occurred in the State of Pennsylvania since September 29, 1888, a period of four years within a few days.

No case has occurred in the State of Maryland since September 18, 1889, a period of three years.

No case has occurred in the State of New York since April 30, 1891, a period of more than one year and four months.

No case has occurred in the State of New Jersey since March 25, 1892, a period of six months, and no case has occurred in any other portion of the United States within the past five years.

I do, therefore, hereby officially declare that the United States is free from the disease known as contagious pleuro-pneumonia.

J. M. RUSK,
Secretary.

Done at the city of Washington, D. C., this 26th day of September, A. D. 1892.

Since this proclamation was issued a continuous inspection has been maintained in New Jersey and in that portion of New York adjoining that district of New Jersey which had been infected, but no animal has since been found showing any evidence of being affected with pleuro-pneumonia. The success of this branch of the work of the Bureau of Animal Industry has therefore been complete, and this dangerous and much-dreaded disease has been eradicated from our soil.

The United States is the first of the large nations of the world which having been once extensively infected with this contagion, has been able to completely extirpate it. The time required for this was only about five years and the total expenditure has been but a little in excess of \$1,500,000. When it is considered that there were grave doubts entertained of the possibility of eradicating this disease and also that other countries have labored a much longer time and made greater expenditures of money without success, the favorable outcome from our efforts which has been reached in such a comparatively short time, and with so small an expenditure of money, is one with which we have every reason to be pleased. The danger from this source which menaced the American cattle industry has been removed; the local restrictions placed upon our interstate trade have been revoked, and the cattle market is beginning to recover from these depressing influences. The following tables show the amount of work which has been done in the different infected States by years, and also a summary of the whole work:

Amount of work done in the State of Illinois, by years, for the eradication of pleuro-pneumonia.

| | Sept. 1, 1886, to Dec. 31, 1887. | 1888. | Total. |
|--------------------------------------|---|--------|---------|
| Herds inspected | 7, 411 | 140 | 7, 551 |
| Cattle inspected | 24, 059 | 285 | 24, 344 |
| Post-mortem examinations | 7, 267 | 1, 712 | 8, 979 |
| Number diseased on post-mortem | 350 | 4 | 354 |
| Premises disinfected | 677 | 1 | 678 |
| Diseased cattle purchased | 172 | 4 | 176 |
| Exposed cattle purchased | 870 | 129 | 999 |

Amount of work done in the State of Maryland, by years, for the eradication of pleuro-pneumonia.

| | 1887. | 1888. | 1889. | 1890. | Total. |
|-------------------------------------|--------|--------|--------|---------|---------|
| Herds inspected..... | 5,704 | 9,809 | 10,904 | 4,210 | 30,627 |
| Cattle inspected..... | 57,868 | 60,312 | 79,606 | 108,376 | 306,152 |
| Cattle tagged..... | | 17,749 | 10,534 | 5,463 | 33,746 |
| Post-mortem examinations..... | 2,788 | 5,820 | 11,491 | 12,949 | 33,048 |
| Number diseased on post-mortem..... | 1,137 | 507 | 76 | | 1,720 |
| Premises disinfected..... | 145 | 145 | 35 | 1 | 326 |
| Diseased cattle purchased..... | 1,442 | 459 | 73 | | 1,974 |
| Exposed cattle purchased..... | 1,564 | 1,036 | 310 | 20 | 2,930 |

NOTE.—To the items “Diseased cattle purchased” and “Exposed cattle purchased” in 1887 are added all purchases of cattle from July 1, 1886, to December 31, 1886.

Amount of work done in the State of New York, by years, for the eradication of pleuro-pneumonia.

| | 1887. | 1888. | 1889. | 1890. | 1891. | 1892. | Total. |

NOTE.—The figures for 1892 are brought down to September 26, the date on which the quarantine was removed.

Table summarizing amount of work done in the different States in which pleuro-pneumonia has existed, for the eradication of this disease.

| | Illinois. | Maryland. | New York. | New Jersey. | Pennsylvania. | Grand total. |
|---|-----------|-----------|-----------|-------------|---------------|--------------|
| Total number herds inspected..... | 7,551 | 30,627 | 65,192 | 51,330 | 12,251 | 166,951 |
| Total number cattle inspected..... | 24,344 | 306,152 | 610,754 | 421,495 | 242,976 | 1,605,721 |
| Total number cattle tagged..... | | 33,746 | 211,109 | 68,778 | 53,333 | 366,966 |
| Total number post-mortem examinations | 8,979 | 33,048 | 96,422 | 40,734 | 177,221 | 356,404 |
| Total number diseased on post-mortem. | 354 | 1,720 | 4,321 | 954 | 89 | 7,438 |
| Total number premises disinfected..... | 678 | 326 | 2,161 | 840 | 123 | 4,128 |
| Total number diseased cattle purchased. | 176 | 1,974 | 3,347 | 844 | 63 | 6,404 |
| Total number exposed cattle purchased. | 999 | 2,930 | 9,019 | 2,467 | 142 | 15,557 |

NOTE: To the items "Total number diseased cattle purchased" and "Total number exposed cattle purchased" are to be added the following purchased in Virginia and District of Columbia: 45 diseased animals, making a total of 6,449.

Virginia and District of Columbia 57 exposed animals, making a total of 15,614.

The following table gives a summary of the expenditures for the eradication of pleuro-pneumonia from the beginning of the work to September 1, 1892.

Expenditures for the eradication of contagious pleuro-pneumonia from July 1, 1886, to September 1, 1892.

| States. | Salaries. | Traveling. | Miscellaneous. | Affected cattle. | Exposed cattle. | Total. | Animals— | |
|--|--------------|-------------|----------------|------------------|-----------------|--------------|----------------|---------------|

* Investigating reported outbreaks.

MOVEMENT OF CATTLE FROM SPLENETIC FEVER DISTRICT.

The regulations for preventing the dissemination of the disease known as splenetic or Texas fever, which have been enforced during 1892, are substantially the same as those issued in 1891. The changes which have been made have had the effect to place outside of the infected district a number of counties in Texas, Tennessee, North Carolina, and Virginia, which were previously included in this district, but which experience has shown were free from the contagion. The object of the regulations is to separate the infected from the noninfected cattle in the stock yards and channels of transportation outside of the infected district, and to secure the cleaning and disinfection of all cars which have carried infected cattle. The regulations have not prevented or hindered the shipment of cattle from the infected districts to the markets for slaughter, nor have they depreciated the value of these cattle. On the contrary, they have had a marked tendency to sustain and increase the values of cattle by preventing losses from this disease, and by increasing the purchases for feeding purposes, on account of the safety with which these can now be made. The full text of the regulations is as follows:

REGULATIONS CONCERNING CATTLE TRANSPORTATION.

U. S. DEPARTMENT OF AGRICULTURE,
OFFICE OF THE SECRETARY,
Washington, D. C., February 26, 1892.

To the managers and agents of railroad and transportation companies of the United States, stockmen, and others:

The regulations concerning cattle transportation issued by this Department January 11, 1892, are hereby revoked, and the following prescribed in place thereof:

In accordance with section 7 of the act of Congress approved May 29, 1884, entitled "An act for the establishment of a bureau of animal industry, to prevent the exportation of diseased cattle, and to provide means for the suppression and extirpation of pleuro-pneumonia and other contagious diseases of domestic animals," and of the act of Congress approved March 4, 1891, making appropriation for the Department of Agriculture for the fiscal year ending June 30, 1892, you are hereby notified that a contagious and infectious disease known as splenic or Southern fever exists among cattle in the following-described area of the United States:

All that country lying east and south of a line commencing at the southwest corner of Valverde County, State of Texas, on the Rio Grande River; thence running northerly along the western boundaries of Valverde and Crockett counties, to the northwest corner of Crockett county; thence easterly along the northern boundaries of Crockett and Schleicher counties to the southeastern corner of Irion County; thence northerly along the eastern boundary of Irion County to the northeast corner of said county; thence northerly to the southern boundary of Coke County; thence westerly to the southwestern corner of Coke County; thence northerly along the western boundary of Coke County to the southern boundary of Mitchell County; thence easterly to the southeast corner of Mitchell County; thence northerly along the western boundaries of Nolan and Fisher counties to the southern boundary of Kent County; thence easterly along the southern boundary of Kent County to the southwestern corner of Stonewall County; thence northerly along the western boundary of Stonewall County to the southeastern corner of Dickens County; thence easterly along the northern boundary of Stonewall County to the southwestern corner of Knox County; thence northerly along the western boundaries of Knox and Hardeman counties to the Red River; thence northwesterly, following the Red River to its point of intersection with the one hundredth meridian of longitude; thence northerly from said point of intersection along said one hundredth meridian to the southern boundary of the State of Kansas; thence easterly along the southern boundary of the State of Kansas to the northeast boundary of the Indian Territory; thence southerly along the eastern boundary of the Indian Territory to the southwest corner of the State of Missouri; thence easterly along the southern boundary of the State of Missouri to the Mississippi River; thence running southerly along the Mississippi River to the southwestern corner of the county of Lauderdale, State of Tennessee; thence running easterly, following the southern boundaries of the counties of Lauderdale, Crockett, Gibson, Carroll, Benton, Perry, Lewis, Maury, Marshall, Bedford, Coffee, Grundy, Sequatchie, Hamilton, Meigs, McMinn, and Monroe, State of Tennessee, to the eastern boundary of said State; thence following the northern boundaries of the counties of Cherokee, Macon, Jackson, Transylvania, and Henderson, State of North Carolina, to the southeast corner of the county of Buncombe, of said State; thence in a northeasterly direction, following the Blue Ridge Mountains, to the southwest corner of the county of Madison, State of Virginia; thence easterly along the southern boundaries of the counties of Madison, Culpeper, and Stafford; thence northerly along the eastern boundary of Stafford County to the Potomac River; thence following the Potomac River southerly to the Chesapeake Bay; thence easterly along the southern boundary of the State of Maryland to the Atlantic Ocean. From the 1st day of March to the 1st day of December, 1892, no cattle are to be transported from said area to any portion of the United States north or west of the above-described line, except by rail for immediate slaughter, and when so transported the following regulations must be observed:

1. When any cattle in course of transportation from said area are unloaded north or west of this line to be fed or watered, the places where said cattle are to be fed or watered shall be set apart and no other cattle shall be admitted thereto.

2. On unloading said cattle at their points of destination, pens shall be set apart to receive them, and no other cattle shall be admitted to said pens; and the regulations relating to the movement of Texas cattle, prescribed by the cattle sanitary officers of the State where unloaded, shall be carefully observed. The cars that have carried said stock shall be cleansed and disinfected before they are again used to transport, store, or shelter animals or merchandise.

3. All cars carrying cattle from said area shall bear placards stating that said cars contain Southern cattle, and each of the waybills of said shipments shall have

a note upon its face with a similar statement. Whenever any cattle have come from said area and shall be reshipped from any point at which they have been unloaded to other points of destination, the cars carrying said animals shall bear similar placards with like statements, and the waybills be so stamped. At whatever point these cattle are unloaded they shall be placed in separate pens, to which no other cattle shall be admitted.

4. The cars used to transport such animals, and the pens in which they are fed and watered, and the pens set apart for their reception at points of destination, shall be disinfected in the following manner:

(a) Remove all litter and manure. This litter and manure may be disinfected by mixing it with lime or diluted sulphuric acid, or if not disinfected, it may be stored where no cattle can come in contact with it until after December 1.

(b) Wash the cars and the feeding and watering troughs with water until clean.

(c) Saturate the walls and floors of the cars and fencing troughs and chutes of the pens with a solution made by dissolving four ounces of chloride of lime to each gallon of water. Or disinfect the cars with a jet of steam under a pressure of not less than 50 pounds to the square inch.

5. It is expressly provided that cattle may be removed from those counties in the State of Tennessee which lie south of the line hereinabove described to those counties lying north of said line in said State, for grazing purposes, in accordance with the regulations of the authorities of the State of Tennessee.

6. It is further expressly provided that cattle which have been at least ninety days in the counties of Coke, the eastern portion of Tom Green, Nolan, Fisher, Stonewall, Haskell, Knox, and Hardeman, State of Texas, which lie within the above-described area, may be moved from said counties by rail into the States of Colorado, Wyoming, and Montana, in accordance with the regulations made by said States for the admission of Southern cattle thereto: *Provided,*

(1) That cattle from said area shall go into said States only for slaughter or grazing, and shall on no account be shipped from said States into any other State or Territory of the United States before the 1st day of December, 1892.

(2) That such cattle shall not be allowed in pens or on trails or on ranges that are to be occupied or crossed by cattle going to the eastern markets before December 1, 1892, and that these two classes of cattle shall not be allowed to come into contact.

(3) That all cars which have carried cattle from said area shall, upon unloading, at once be cleaned and disinfected in the manner provided by these regulations.

(4) That the State authorities of the States of Colorado, Wyoming, and Montana agree to enforce these provisions.

The losses resulting yearly to the owners of susceptible cattle in the interstate and export trade by the contraction of this disease from exposure in unclean and infected cars and pens, and by means of the manure carried in unclean cars from place to place, have become a matter of grave and serious concern to the cattle industry of the United States. It is absolutely essential, therefore, that this cattle industry should be protected as far as possible by separating the dangerous cattle and by the adoption of efficient methods of disinfection.

Inspectors will be instructed to see that disinfection is properly done, and it is expected that transportation companies will promptly put into operation the above methods.

Very respectfully,

J. M. RUSK,
Secretary.

The following supplemental regulations were made during the year:

U. S. DEPARTMENT OF AGRICULTURE,
OFFICE OF THE SECRETARY,
Washington, D. C., June 13, 1892.

Notice is hereby given that the regulations of the U. S. Department of Agriculture, dated February 26, 1892, concerning cattle transportation, are modified so as to exclude the counties of Orange, Albemarle, Greene, Nelson, and Amherst, in the State of Virginia, from the infected area described in said regulations, and the quarantine line established by said regulations is hereby changed so as to run along the southern boundaries of said counties, placing these counties north of said line.

J. M. RUSK,
Secretary.

U. S. DEPARTMENT OF AGRICULTURE,
OFFICE OF THE SECRETARY,
Washington, D. C., July 5, 1892.

The permission granted to ship cattle from the counties named in the sixth regulation of the regulations of the Department of Agriculture, of date February 26, 1892, concerning cattle transportation, into the States of Colorado, Wyoming, and Montana, is hereby extended to shipments, under the conditions named in said sixth regulation, to the State of South Dakota.

J. M. RUSK,
Secretary.

U. S. DEPARTMENT OF AGRICULTURE,
OFFICE OF THE SECRETARY,
Washington, D. C., July 18, 1892.

*To the managers and agents of railroad and transportation companies
of the United States, stockmen, and others:*

Whereas the county of Uvalde, State of Texas, was, by an order duly made by the Secretary of Agriculture, on the 26th day of February, 1892, in pursuance of the act of Congress of May 29, 1884, and acts supplemental thereto, declared to be infected with a contagious and infectious disease known as splenetic or southern fever; and

Whereas the county of Pecos, State of Texas, was, by said order, included in the area of country declared to be free of the said contagious and infectious disease; and

Whereas a large number of cattle have been moved from the said county of Uvalde into the county of Pecos, State of Texas, since the making of said order, and such movement of cattle is a violation of said order, and the cattle moved into Pecos County having rendered all cattle in said county dangerous to be moved into other uninfected areas of the United States: it is, therefore,

Ordered, That no cattle shall be moved from the county of Pecos, State of Texas, into parts of the United States north or west of the said county of Pecos, except for purposes of immediate slaughter, and then to be kept separate as infected cattle.

J. M. RUSK,
Secretary.

These regulations concerning cattle transportation have been as rigidly maintained as was possible under existing laws. In the main they have been extremely successful in preventing the spread of the disease, and cattle have been safely purchased in all the large stock yards of the country for feeding purposes without any losses having occurred among them from splenetic fever so far as this Department is informed. The numerous large outbreaks which have been the rule in former seasons have not occurred, and, with the exception of an outbreak in western Texas and one in Lyons and adjoining counties in Kansas, none have been reported. The number of cases of splenetic fever occurring among export cattle has also been greatly reduced as compared with former years. One of the main causes of the appearance of splenetic fever among export cattle is the shipment of these animals in cars which had not been disinfected and which had carried infected cattle to points in various States where this Department had no representatives. The Department has maintained a corps of inspectors at all of the large stock yards to which infected cattle are transported and from which they are sent to other points in small consignments, and has, whenever possible, informed the authorities of the various States to which cars containing such cattle were going of their destination. In such cases it has been necessary to leave to State authorities the enforcement of their local regulations for handling such cattle and for disinfecting the cars. In many cases, however, the cars under such circumstances are not disinfected, and, being used for the shipment of susceptible cattle, the disease is thereby contracted. The

prevention of this disease will probably not be absolute until Congress enacts some legislation that will compel railroad companies to comply with the regulations for cleaning and disinfecting cars that have carried infected cattle, and to provide penalties for the violation of the other sections of the regulations. There have been reported 131 head of cattle in the export trade affected with this disease during 1892, as compared with 524 for the same period in 1891. This shows a very gratifying improvement; but, in order to maintain the reputation of our export cattle and to keep the trade at its present proportions, the number affected with the disease should be still further reduced. This can only be accomplished by rigidly maintaining the boundary lines of the infected district as at present defined and in adopting still more stringent measures to secure the disinfection of cars. The following table shows the places at which inspection has been made, the number of cattle which have been inspected, and also the number of cars which have been cleaned and disinfected under the supervision of Department employes:

Work performed by inspectors of the Bureau of Animal Industry in supervising the movement of infected cattle during the quarantine season, February 26 to December 1, 1892.

| Place. | Car loads of cattle received from infected district and inspected at quarantine pens. | Cattle contained in cars received at quarantine pens. | Car loads in transit for points beyond. | Cars cleaned and disinfected. |
|---------------------------|---|---|---|-------------------------------|
| South Omaha, Nebr..... | 274 | 6,939 | 17 | 274 |
| Chicago, Ill..... | 25,628 | 690,681 | 2,476 | 25,173 |
| Kansas City, Mo..... | 12,344 | 356,970 | 7,498 | |
| East St. Louis, Ill..... | 15,415 | 430,126 | 10,754 | |
| Indianapolis, Ind..... | 1,361 | 28,581 | 1,134 | 265 |
| Pittsburg, Pa..... | 580 | 15,269 | 539 | 41 |
| Baltimore, Md..... | 8 | 172 | 3 | 7 |
| Philadelphia, Pa..... | 504 | 10,594 | 37 | 504 |
| New York, N. Y..... | 1,218 | 39,862 | | 1,218 |
| Boston, Mass..... | 50 | 977 | | |
| Buffalo, N. Y..... | 1,286 | 36,151 | 1,213 | 873 |
| Argentine, Kans..... | 7,597 | 229,809 | 7,597 | 6,644 |
| Herington, Kans..... | 3,942 | 109,391 | 3,942 | 2,093 |
| Parsons, Kans..... | 9,086 | 243,051 | 9,086 | 2,016 |
| State Line, Kans..... | 2,058 | 57,110 | 2,058 | 1,323 |
| Baxter Springs, Kans..... | 306 | 8,976 | 306 | 79 |
| Poplar Bluff, Mo..... | 1,920 | 53,280 | 1,920 | |
| Springfield, Mo..... | 8,177 | 227,662 | 8,177 | |
| • Total | 91,754 | 2,545,601 | 56,757 | 40,515 |

It appears from the above table that more than 2,500,000 of cattle from the infected district have been inspected and kept separated from other cattle in the channels of commerce, and that more than 40,000 cars have been disinfected under the supervision of the Department inspectors. This great amount of work has been accomplished without friction, and without hardship to those who have owned the stock. It is a line of work which has been extremely popular, as every one who has been engaged in the shipment or sale of cattle has been able to see the benefits which the regulations have secured. Just how much has been saved by the prevention of disease and facilitating the movement and sale of cattle, it is impossible to accurately estimate, but there is no doubt that it amounts to several millions of dollars. The insurance on export cattle has been greatly reduced because of the diminution of losses from this disease, and it is estimated that there has been a saving in this direction alone of about \$5 on each animal

exported. This would amount to nearly \$2,000,000, with the number of cattle exported during the present year.

INSPECTION OF EXPORT ANIMALS.

The inspection of animals for export has been continued during the year, under the provisions of the act of Congress approved August 30, 1890, and in the manner described in the last report made to Congress. The animals inspected have been principally cattle, and the following table shows the number inspected, the points at which the inspection was made, the number tagged for export, and the number of animals rejected by the inspectors:

Number of cattle inspected and tagged for export at the various stock yards and ports during the fiscal year ending June 30, 1892; also number rejected on account of disease.

| Stock yards. | Cattle inspected. | Cattle tagged. | Cattle rejected. |
|-------------------------|-------------------|----------------|------------------|
| Chicago, Ill. | 244, 109 | 243, 343 | 766 |
| Buffalo, N. Y. | 153, 435 | 33, 096 | 46 |
| Baltimore, Md. | 70, 530 | 41, 116 | 5 |
| Philadelphia, Pa. | 28, 509 | 2, 293 | 4 |
| Indianapolis, Ind. | 2, 677 | | |
| Pittsburg, Pa. | 27, 568 | 8, 248 | 6 |
| Boston, Mass. | 129, 512 | 20, 417 | 7 |
| Portland, Me. | 8, 251 | 45 | |
| New York, N. Y. | 149, 800 | 36, 460 | 9 |
| Norfolk, Va. | 912 | 912 | |
| New Orleans, La. | 661 | 661 | |
| Newport News, Va. | 8, 242 | 2, 889 | |
| Total | 824, 206 | 389, 480 | 843 |

Under the column "Cattle inspected" is included all re-inspections made at ports of export of cattle previously inspected and tagged at interior yards; also, reinspections made at the yards at Buffalo, and Pittsburg of cattle that had previously been inspected at Chicago. This column shows the total amount of work done at the various yards and ports throughout the country in the handling of export cattle.

The following table shows the number of vessels inspected, the number of cattle exported from the various ports, and the countries to which they were shipped:

Exports of domestic cattle to Europe for the fiscal year ending June 30, 1892, as compared with the exports for the fiscal year ending June 30, 1891.

| Port of export. | No. steamers inspected. | Great Britain. | Germany. | Belgium. | France. | Total. |
|---|-------------------------|----------------|----------|----------|---------|----------|
| New York, N. Y. | 382 | 145, 762 | 3, 440 | 448 | 150 | 149, 800 |
| Boston, Mass. | 240 | 129, 512 | | | | 129, 512 |
| Baltimore, Md. | 153 | 62, 422 | 382 | 588 | 520 | 63, 912 |
| Philadelphia, Pa. | 78 | 28, 190 | | | | 28, 190 |
| New Orleans, La. | 5 | 661 | | | | 661 |
| Portland, Me. | 24 | 8, 251 | | | | 8, 251 |
| Norfolk, Va. | 5 | 912 | | | | 912 |
| Newport News, Va. | 30 | 8, 242 | | | | 8, 242 |
| West Point, Va. | | | | | | |
| Aggregate, fiscal year ending June 30, 1892. | 917 | 383, 952 | 3, 822 | 1, 036 | 670 | 389, 480 |
| Aggregate, fiscal year ending June 30, 1891. | 489 | 344, 417 | 5, 518 | 6, 582 | 5, 885 | 362, 402 |

NOTE.—The exports for the fiscal year ending June 30, 1892, show an increase of $7\frac{1}{2}$ per cent over the exports for the preceding year.

The exports for the fiscal year ending June 30, 1892, show a gratifying increase of $7\frac{1}{2}$ per cent over the exports for 1891, and an increase

of 4½ per cent over the exports for 1890. This increase in the exports of cattle to foreign countries is due in a large measure to the system of inspection inaugurated for this trade, and has been accomplished notwithstanding the increased prices for cattle in this country.

INSPECTION OF IMPORT ANIMALS.

The inspection of animals imported into the United States under the provisions of the act of Congress approved August 30, 1890, is made partly under the Inspection and partly under the Quarantine Division of this Bureau. Animals from Canada and Mexico are inspected at ports of entry, and in case they are found healthy are allowed entry without detention. This inspection is made by the Inspection Division. Animals coming from other countries than those situated in North, Central, and South America, are quarantined at the port of entry under the direction of the Quarantine Division. This work will be referred to later on in this report. No entries of animals have been reported from Mexico during the year. The number and kind of animals imported from Canada, as reported by the inspectors of the Inspection Division, is shown by the following table:

Imports of cattle, sheep, and swine into the United States from Canada during the fiscal year ending June 30, 1892.

| Port of entry. | No. cattle. | No. sheep. | No. swine. |
|-------------------------------|----------------|---------------|---------------|
| Buffalo, N. Y. | 185 | 194,103 | 1 |

* 513 cattle en route to Boston for export.

† 1,388 cattle en route to Boston for export.

‡ 100 cattle en route to Boston for export.

§ 103 sheep quarantined for foot rot; recovered.

NOTE.—This statement does not include imported live stock received at the quarantined stations located on the seaboard.

The necessity for the inspection of animals from Canada is evident from the widespread prevalence of foot-and-mouth disease and pleuropneumonia in Europe, and the constant importation of animals from Europe into Canada. Only one lot of animals from Canada has been detained, and that was a lot of 123 sheep affected with foot rot, a contagious disease which causes heavy losses to sheep-owners, and which should be guarded against. At present there is no authority for inspecting imported horses, and as these animals are liable to be affected by any one of several serious contagious diseases, it would seem that some provision should be made for the inspection of these animals, and for preventing their entry in case they are found to be affected with such diseases.

INSPECTION OF AMERICAN CATTLE IN GREAT BRITAIN.

The American veterinarians located at the foreign animal wharves in Great Britain, by the courtesy of the British authorities, have continued inspecting cattle landed there from this country. The object of this inspection has been to learn the condition in which our cattle arrive, the extent of the losses at sea, and to determine if the lung disease with which some of these animals have been found affected by the British inspectors was really contagious pleuro-pneumonia, as alleged by them.

In order to obtain all the evidence possible on this point, our cattle have all been tagged with a number, and records kept by which they could be traced to the stock yard where originally purchased, and also to the farms on which they were fed. This gives a history of any individual animal, in connection with the veterinarian's diagnosis of disease. During the year four animals have been reported by the British inspectors as being affected with contagious pleuro-pneumonia. Two of these, according to the opinion of the American inspectors, were affected with bronchial pneumonia, from cold and exposure during the voyage, and two were reported as affected with emphysema of the lungs, with no appearance of contagious pleuro-pneumonia. The tag numbers of these animals were cabled to the Department, an inspector was sent to the farms from which they came, where a careful investigation showed that there had been no contagious disease of cattle to which these animals might have been exposed. It is evident, therefore, that none of these animals were affected with contagious pleuro-pneumonia, because this disease did not exist in the section of the country from which they came. The total number of cattle inspected by the veterinarians of this department in Great Britain during the year, and the loss reported by them as having occurred at sea, is shown by the following table:

Losses at sea and number of cattle inspected by our inspectors stationed at London, Liverpool, and Glasgow, during the fiscal year ending June 30, 1892.

| Port. | No. cattle inspected. | Loss at sea. |
|----------------|-----------------------|--------------|
| London | 139, 750 | 991 |
| Liverpool..... | 183, 693 | 1, 814 |
| Glasgow..... | 44, 571 | 468 |
| Total | 368, 014 | 3, 273 |

Percentage of loss during the fiscal year ending June 30, 1892, $\frac{7}{8}$ of 1 per cent.

Percentage of loss during the fiscal year ending June 30, 1891, $1\frac{1}{3}$ per cent.

VESSEL INSPECTION.

The inspection of vessels carrying export cattle has been maintained during the year under the act of Congress approved March 3, 1891, to insure the safe transportation and humane treatment of cattle on their voyage across the Atlantic. The total number of vessels inspected during the year was 917, of which 382 sailed from the port of New York, 240 from the port of Boston, 153 from the port of Baltimore, 78 from the port of Philadelphia, 35 from the port of Newport News, 5 from the port of New Orleans, and 24 from the port of Portland, Oregon. There has been a marked improvement in the fittings and ventilation of most of the vessels carrying cattle and this has resulted in the animals reach-

ing their destination in better condition and also the diminished loss at sea. The percentage of loss of cattle during the voyage, including all causes, was only $\frac{7}{8}$ of 1 per cent. As the loss during 1891 was $1\frac{2}{3}$ per cent, a marked improvement is shown by this report.

MEAT INSPECTION.

At the time my report for last year was written, inspection was being made of the products of twenty-two abattoirs, under the act of Congress approved March 3, 1891. At the present time the number of establishments provided with meat inspection has been increased to thirty-eight, and arrangements are being made to extend the inspection still more. The total number of animals examined under the Department regulations of March 25, 1891, and the products of which have been marked for identification in the manner prescribed in the regulation, was, for the fiscal year ending June 30, 1892, 5,076,929. Of this number 3,167,150 were cattle; 1,267,329 were hogs; 583,361 were sheep, and 590,899 were calves. There were 1,990,771 quarters of beef tagged for export, and 8,160,625 for interstate trade, while 688,176 carcasses went to canning establishments. There were stamped and marked for identification, in accordance with the regulations, 797,707 packages of canned, salted, and smoked beef products. Of the 3,167,150 head of cattle inspected, 141 were condemned on ante-mortem examination, and 1,914 on post-mortem examination. Of the 583,361 sheep, 197 were condemned on post-mortem examination. Of the 1,267,329 hogs inspected microscopically, there were found 25,899 infected with trichinæ. The following table shows the work in detail for the year ending June 30, 1892:

Meat-inspection work, fiscal year ending June 30, 1892.

| | |
|---|-------------|
| Number cattle inspected | 3, 167, 150 |
| Number diseased on inspection | 141 |
| Post-mortems made | 3, 167, 009 |
| Number diseased | 1, 914 |
| Dressed quarters for export | 1, 190, 771 |
| Dressed quarters for interstate trade | 8, 160, 625 |
| Carcasses to other establishments than were examined | 627, 237 |
| Packages of canned meat stamped | 495, 577 |
| Packages of salted meat stamped | 142, 698 |
| Packages of smoked meat stamped | 159, 432 |
| Number hogs inspected | 1, 267, 329 |
| Number diseased with trichinæ | 25, 899 |
| Packages of salted pork, bacon, and hams stamped for export | 76, 266 |
| Number sheep inspected | 583, 361 |
| Number diseased | 197 |
| Dressed carcasses for export | 383, 157 |
| Calves inspected | 59, 089 |
| Number certificates issued | 5, 783 |
| Total number of animals examined | 5, 076, 929 |

EXPORTATION OF INSPECTED PORK PRODUCTS.

The first decree removing the prohibition against the importation of American hog products into any of the European countries was made in September, 1891. From that time until the close of the fiscal year ending June 30, 1892, the Department issued certificates for 76,911 packages of pork products, containing 38,152,874 pounds. The following is a table showing the exports of inspected pork products to

June 30, 1892, giving the countries to which the same were exported, respectively:

Cases and weight of pork products exported for the fiscal year ending June 30, 1892.

| Countries. | Cases. | Pounds. |
|----------------------------|--------|------------|
| Germany | 39,355 | 19,627,726 |
| Belgium | 14,098 | 7,141,946 |
| Holland | 8,345 | 4,279,416 |
| France | 3,432 | 1,645,625 |
| England and Scotland | 9,567 | 4,399,675 |
| Denmark | 1,338 | 671,697 |
| Italy | 156 | 75,713 |
| Norway and Sweden | 610 | 306,139 |
| Spain | 10 | 4,937 |
| Total | 76,911 | 38,152,874 |

The exports in the above table credited to Belgium and England and Scotland probably found their way to the German and French markets, as they were forwarded to houses in Belgium and Great Britain for orders from French and German merchants. We may therefore conclude that practically all inspected pork certified to by the Department went either directly or indirectly to those countries which have lately removed their decrees of prohibition against the importation of American pork. While the direct effect of the removal of the prohibition by foreign countries, obtained by reason of the system of meat inspection inaugurated in this country under the act of Congress approved March 3, 1891, has been to find a market in such countries for 38,152,874 pounds of bacon, hams, and pork, the indirect effect has been to increase our exports to all European countries to a large extent. The mere fact of the removal of the decrees of prohibition was to reestablish confidence in the purity of our pork products, which had been seriously damaged by reason of these decrees made in the latter part of 1881 and subsequently.

For the fiscal year 1881, just prior to the imposition of these decrees of prohibition, the total exportation of hog products from the United States to foreign countries amounted to \$104,660,065. For the fiscal year 1883, after these decrees went into effect, and their influence was fairly felt, our exports amounted to but \$70,966,268, being a loss of \$33,693,797 in the values of our exports for 1883 as compared with 1881. Of this loss the proportion chargeable directly to Germany and France was \$11,624,884, leaving a loss of \$22,068,913 as the loss to be accounted for in such portions of the exports taken by Germany and France through the channels of commerce entering from other countries, and by the loss of confidence in other countries caused by these prohibitory decrees.

It is early yet for our export trade in these products to feel the full effect of the restoration of confidence in the wholesomeness of our pork, but we are beginning to feel the first effects of such confidence, and a comparison of our export trade of the last four months with the exports for a like period of the preceding year will show a gratifying improvement.

The following is a table giving the quantities and values of pork products exported to all European countries for the months of May, June, July, and August, 1892, as compared with the exports for the same months of the year 1891:

Quantities and values of our pork products exported to all countries in Europe during the months of May, June, July, and August, 1892, as compared with the exports for the corresponding months of 1891.

| Month. | Quantities. | | Values. | | Increase for 1892. | | Percentage of increase for 1892. | |
|--------------|----------------|----------------|-------------|-------------|--------------------|-------------|----------------------------------|---------------------|
| | 1891. | 1892. | 1891. | 1892. | Quantities. | Values. | Increase in quantities. | Increase in values. |
| | <i>Pounds.</i> | <i>Pounds.</i> | | | <i>Pounds.</i> | | | |
| May | 46,975,161 | 82,086,866 | \$3,613,324 | \$6,333,007 | 35,111,705 | \$2,719,683 | 74 $\frac{3}{4}$ | 75 $\frac{1}{2}$ |
| June | 46,358,489 | 85,741,268 | 3,575,006 | 6,632,868 | 39,182,719 | 3,057,862 | 84 $\frac{1}{2}$ | 85 $\frac{3}{4}$ |
| July | 59,320,966 | 83,831,502 | 4,637,502 | 6,746,523 | 24,510,536 | 2,109,021 | 41 $\frac{1}{2}$ | 45 $\frac{3}{4}$ |
| August | 54,142,072 | 84,039,342 | 4,130,520 | 6,878,156 | 29,897,270 | 2,747,636 | 55 $\frac{1}{2}$ | 66 $\frac{1}{2}$ |
| Total .. | 206,996,688 | 335,698,918 | 15,956,352 | 26,590,554 | 128,702,230 | 10,634,202 | 62 $\frac{1}{2}$ | 66 $\frac{1}{2}$ |

It will be seen from the foregoing table that the exports of our pork products for the four months of 1892 has been 128,353,731 pounds over the exports for the same period in 1891, or an increase of 62 per cent, while the increase in values for 1892 has been \$10,634,802, or an increase of 66 $\frac{1}{2}$ per cent. The increase in values is greater than the increase in quantity for the reason that the prices for 1892 have been higher than the prices for 1891. The work of meat inspection has more than justified the sanguine hopes of its promoters, and fully warrants the comparatively small expense incurred by the Government for its maintenance.

DIVISION OF ANIMAL PATHOLOGY.

The work of this division includes all scientific investigations in regard to the nature, prevention and treatment of animal diseases.

The most important work of the year has been the completions of the investigations as to the nature of the Texas or splenic fever of cattle, and the way in which the infection is carried and transmitted by animals from the infected district. This investigation has been extremely successful, and the mysteries connected with the spread of this disease are now satisfactorily explained. A special report upon the subject has been prepared, which is now ready for the printer.

The study of this disease, which has caused losses of great magnitude in the past, may justly be regarded, both from a scientific and practical point of view, as among the most important researches ever undertaken by the Department. The successful elucidation of the character of this disease makes it possible to intelligently formulate measures for its prevention and control.

On account of the continued Declaration of the British inspectors that cases of contagious pleuro-pneumonia were frequently discovered among American cattle landed in Great Britain, considerable time has been given to the study of various forms of pneumonia in cattle. Since the promulgation of the proclamation declaring the United States to be free from the disease, there have been more cases reported by the English inspectors among our cattle in the space of three months than were reported for the two preceding years. Apparently every lung affection arising from exposure, injury or other causes, which is discovered in an American bullock, is now promptly recorded as a case of contagious pleuro-pneumonia.

As this country is now known to be free from that disease, it is plain that the British inspectors are mistaken in their diagnosis. Several of the best known veterinarians of the world, after seeing specimens from the lungs of our exported cattle which had been pronounced affected, were clear in their statements that none of the peculiar characters of contagious pleuro-pneumonia existed in them. It is essential, therefore, that the different affections of the lung to which cattle are subject should be described and illustrated more carefully than heretofore, in order that any grounds for difference of opinion, from a scientific point of view, may be removed. The work of the year on such diseases has been of a preliminary character, with a view of making a convincing scientific report on the whole question.

Much scientific work has also been done in connection with the diseases known as tuberculosis and glanders. The losses from these diseases, and their danger to human health and life, make it extremely desirable that something should be done for their control. The great obstacle in the way of measures for this object has been the difficulty of diagnosing these diseases, except with certain animals which are plainly affected. For example, in a herd of forty cattle, three or four may be plainly affected with tuberculosis, four or five others may be suspicious, and some others, which are actually affected, may show no symptoms of the disease. It is evident that under such circumstances it would be necessary either to destroy the whole herd or to leave some affected animals to propagate the contagion. The same is true of glanders in horses.

Recent investigations show that the germs of these two diseases produce, during their multiplication, a chemical substance which, when properly administered to affected animals, increases their temperature so remarkably as to almost invariably reveal the presence of the malady even in the first stages. Experiments have been made to determine the best methods of obtaining these valuable bacterial products in sufficient quantities to be used for the purpose mentioned. These experiments have been successful, and if Congress deems it best to authorize the Department to adopt measures for the control of either tuberculosis or glanders or of both of these diseases, the laboratory of the Bureau is now in condition to supply this indispensable diagnostic agent.

Researches of great value have also been made in regard to the varieties and life history of the parasites affecting the domestic animals in this country. Many new species have been studied, and their connection with various diseases has been traced. This is a wide field of investigation from which most important practical results may be confidently predicted. With the single exception of the Special Report on the Diseases of the Horse, there has been no more popular report issued from this Department than that on the Animal Parasites of Sheep. The numerous requests for this little volume, which are far beyond the ability of the Department to supply, demonstrate the widespread interest in the subject. Other reports of this nature are in preparation, but as the whole field must be worked over scientifically on account of the present lack of accurate knowledge, the progress is necessarily slower than with subjects which have received more attention from the scientific world.

The laboratory of the Bureau has also been engaged upon questions relating to the prevention of swine diseases, and in coöperating with the division of field investigations to determine the nature of outbreaks of disease among all classes of animals in various sections of the

country. There are many demands for this class of work, and it is usually of such an urgent nature and so important withal, that it must be given constant attention.

DIVISION OF FIELD INVESTIGATIONS AND MISCELLANEOUS WORK.

The work of this division was fully described in my report to Congress for the year 1891. Briefly stated, it consists in conducting the investigations in the field as to the nature of diseases affecting animals in different sections of the country, in collecting information as to the condition and needs of the animal industry, in replying to inquiries for information on subjects which come within the sphere of the Bureau work, and in supervising the expenditures and accounts of the whole Bureau.

QUARANTINE DIVISION.

Stations detaining cattle, sheep, and other ruminants and swine imported from across the ocean are maintained at the ports of Boston, New York, and Baltimore. The outbreak of foot-and-mouth disease in Great Britain, which began early in February, 1892, and which spread rapidly in spite of the preventive restrictions that were adopted, made it necessary to exercise the utmost vigilance at the quarantine stations, and finally to decline to issue permits for the importation of animals from affected countries until the disease had been suppressed. This caused a suspension of the importation of sheep from Great Britain for the greater part of the year, but as the disease was finally eradicated, permits for importation are again being issued. Foot-and-mouth disease does not exist in the United States, and has not been in this country since 1884, and as pleuro-pneumonia has been eradicated after a long effort and with great expense, the necessity of a most rigorous system of inspection and quarantine is apparent to prevent the re-introduction of such plagues.

The quarantine stations are well supplied with buildings and fences, and the expense of keeping them in condition is very small. The animals recently imported and quarantined have been mostly sheep. The numbers which have passed through the stations for the fiscal year are as follows: Cattle, 36; sheep, 1,051; swine, 2; goats, 14.

No case of the importation of a dangerous disease has occurred during the year.

PUBLICATIONS.

It is with pleasure that I call attention to the "Special Report on the Diseases of Cattle and on Cattle Feeding," just issued by this Bureau, which is written on the same general plan as was the "Special Report on Diseases of the Horse," a work which has proved to be the most popular publication ever issued by the Department. The high class of the articles which comprise this second volume of the series on the diseases of farm animals and their scientific yet popular character, make it of the greatest value to our farmers, and will certainly give a new impetus to the progress of veterinary science in the United States.

There is also just ready for distribution a magnificent "Special Report on the Sheep Industry of the United States," which treats exhaustively of the formation of our flocks, their management and improvement, and the present condition of the industry. This volume has been written with the object of gathering together the information indispensable for intelligent sheep breeding which has been, heretofore,

for the most part inaccessible. There is already a large demand for the work, and there can be no doubt that when it has been carefully examined by those interested in the sheep business it will prove to be an extremely valuable and popular publication.

There is also going through the press a "Special Report on Texas or Splenic Fever" of cattle, which contains the results of the scientific investigations of this disease. These investigations have been remarkably successful, demonstrating that the disease is caused by a parasite which lives in the red corpuscles of the blood, and that this parasite is generally, if not always, carried to affected animals by ticks.

Such an intricate mode of transmission is very rare if it exists with any other disease, and the fact that the microscopic parasite may be transmitted through the egg from one generation of ticks to another serves to make the whole question still more complicated. The success in clearing up these and many other points, necessary to an understanding of the way in which the malady is transmitted, is one of the best examples of the value of the intelligent application of modern science for solving the mysteries of nature which in various ways affect our agricultural practice. That this disease is now understood and that the measures for its prevention may be hereafter placed upon a scientific basis is a matter for congratulation both from a scientific and practical point of view. It should certainly be an encouragement to continue such investigations until the many other questions which are pressing upon us for solution can be disposed of in an equally satisfactory manner.

The following statement gives the cost of the various branches of the work for the fiscal year:

| | |
|--|---------------------|
| Pleuro-pneumonia | \$124, 234. 49 |
| Salaries and other expenses at Washington..... | 40, 066. 24 |
| Scientific investigation | 29, 737. 22 |
| Investigations of swine diseases..... | 6, 916. 38 |
| Collecting information | 15, 530. 33 |
| Investigation of reported diseases..... | 703. 84 |
| Inspection of stock yards and export cattle..... | 128, 530. 55 |
| Inspection of import cattle..... | 10, 249. 24 |
| Meat inspection..... | 288, 451. 08 |
| Total | 644, 419. 37 |

Accompanying this statement will be found a list of persons employed and tables giving the expenditures of the year in detail.

EXPENDITURES DURING THE FISCAL YEAR ENDING JUNE 30, 1892, AND A LIST OF EMPLOYÉS DURING THE SAME PERIOD.
